Since August 2021, the deportation prison in Glückstadt (Schleswig-Holstein) is already in operation and in 2022 alone, over 200 people were detained there. The prison is shared by Schleswig-Holstein, Mecklenburg-Western Pomerania and Hamburg. For a person to be detained, it is already enough to suspect that the person could evade deportation. For most detainees, detention ends with their deportation.

The cynical slogan „housing minus freedom“ is used in an attempt to portray the prison as a particularly humane detention facility and thus conceal the inhumane reality of deportation detention. A six-meter high wall, locking hours, a fenced inner courtyard and an isolation cell with a fixation option for detainees have nothing to do with „living“. The reports from detainees also speak for themselves.

The psychological stress caused by the environment, unfair treatment and deprivation of liberty is enormous. Hunger strikes and escape attempts show how hopeless and grueling detention is for people. Detention pending deportation is part of the war against refugees and migrants, just like the ever advancing military armament of the EU's external borders or the increasing criminalization of sea rescue.

We are in solidarity with all people on the run, with all people who are motivated to migrate by the hope for peace, equality and perspective. We know that freedom is only possible if it means freedom for all people worldwide!
